

## Career Employer SERIES 6 Study Plan

Welcome to the Career Employer Series 6 Study Plan PDF which serves to help you plan out your study time to create sustainable and efficient long-term study habits. These four time frames seem to work the best: a 4-week study plan, 3-month study plan, 6-month study plan, and a 1-year study plan.

These comprehensive study plans aim to help with any future study endeavors, even beyond preparing for the Series 6 final exam. Overall, the most important part of learning anything new is consistency and the use of appropriate study materials for your style of learning and timeline.

I highly recommend that you pay attention to which of the study materials work best for you, as there are many ways and study materials you can use to help master all domains of knowledge in the Series 6 certification course. And furthermore, using different study materials and methods keeps learning fun and attractive, and allows you to learn and apply different tactics toward the same goal. Now, let's get to the meat of this whole article, which is the four different study plans offered here on Career Employer!

### The Four Career Employer Series 6 Study Plans

- **4-Week Study Plan:** The four-week study plan is ideal for someone that is going to be taking the exam within the next month and needs to cram and/or refresh from their studies in the textbook. Another type of learner could be someone that already has existing certifications in the financial industry and wishes to learn the differences and specifics of Series 6. You will study all of the types of study materials each week and it will feel a bit more crammed if you are unfamiliar with anything regarding the Series 6 exam.
- **3-Month Study Plan:** The three-month study plan is the more typical and, in our opinion, ideal, study plan to emphasize the amount of information learned and the creation of good learning habits. It strikes the perfect balance between those two aspects. It is ideal for someone who has a good amount the time available to study each day and wants to hone in on learning a little bit each day.
- **6-Month Study Plan:** The third option is a six-month plan, which serves a purpose for learners who are very busy and may not have the time for a little bit of studying each and every day. This plan may also be good to follow along with if you are using other outside resources and paid materials, as the practice tests, flashcards, cheat sheet, and free study chapters all are great materials, and it is good to have more than one perspective when studying.

- **1-Year Study Plan:** The final option of the study plan is the one-year study plan, which gives the chance for people to study on their own time and in a more relaxed schedule. It is not as often used, but for someone just learning a new skill or interest on the side, it may be ideal. Some learners may be people who are just extremely busy and can only study a day or two per week.

## The 4-Week Study Plan

In this program, a learner will be utilizing all of the main study materials offered on Career Employer each week.
