Career Employer HESI A2 Study Plan

Welcome to the Career Employer HESI A2 Study Plan PDF which serves to help you plan out your study time to create sustainable and efficient long-term study habits. These four time frames seem to work the best: a 4-week study plan, 3-month study plan, 6-month study plan, and a 1-year study plan.

These comprehensive study plans aim to help with any future study endeavors, even beyond preparing for the HESI A2 final exam. Overall, the most important part of learning anything new is consistency and the use of appropriate study materials for your style of learning and timeline.

I highly recommend that you pay attention to which of the study materials work best for you, as there are many ways and study materials you can use to help master all domains of knowledge in the HESI A2 certification course. And furthermore, using different study materials and methods keeps learning fun and attractive, and allows you to learn and apply different tactics toward the same goal. Now, let's get to the meat of this whole article, which is the four different study plans offered here on Career Employer!

The Four Week Career Employer HESI A2 Study Plans

- **4-Week Study Plan:** The four-week study plan is ideal for someone that is going to be taking the exam within the next month and needs to cram and/or refresh from their studies in the textbook. Another type of learner could be someone that already has existing certifications in the nursing industry and wishes to learn the differences and specifics of HESI A2. You will study all of the types of study materials each week and it will feel a bit more crammed if you are unfamiliar with anything regarding the HESI A2 exam. There's a lot of information to get through, so you will need to invest much of your time if you aim to use this study plan.
- **3-Month Study Plan:** The three-month study plan is the more typical and, in our opinion it is the ideal study plan to emphasize the amount of information learned and the creation of good learning habits. It strikes the perfect balance between those two aspects. It is ideal for someone who has a good amount the time available to study each day and wants to hone in on learning a little bit each day.

- **6-Month Study Plan:** The third option is a six-month plan, which serves a purpose for learners who are very busy and may not have the time for a little bit of studying each and every day. This plan may also be good to follow along with if you are using other outside resources and paid materials, as the practice tests, flashcards, cheat sheet, and free study chapters all are great materials, and it is good to have more than one perspective when studying.
- **1-Year Study Plan:** The final option of the study plan is the one-year study plan, which gives the chance for people to study on their own time and in a more relaxed schedule. It is not as often used, but for someone just learning a new skill or interest on the side, it may be ideal. Some learners may be people who are just extremely busy and can only study a day or two per week.

The 4-Week Study Plan

In this program, a learner will be utilizing all of the main study materials offered on Nurse Code each week. The materials utilized are the Study Guide Chapters, Flashcards, Practice Exams/Quizzes, and a Cheat Sheet. There is a lot to take in here, so daily study is necessary and for a significant amount of time too.

4-Week Study Plan	
Week 1	- Study Module 1: Grammar, Module 2: Reading Comprehension, and Module 3: General Knowledge and Vocabulary.
	- Review flashcards and take practice exams related to the above modules
	- Review the cheat sheets related to the HESI A2 exam, specifically with these Modules in mind
Week 2	- Study Module 4: Biology and Module 5: Physiology and Anatomy
	- Review flashcards and take practice exams related to the above modules
	- Review the cheat sheets related to the HESI A2 exam, specifically with these Modules in mind
Week 3	- Study Module 6: Physics and Module 7: Chemistry
	- Review flashcards and take practice exams related to the above modules
	- Review the cheat sheets related to the HESI A2 exam, specifically with these Modules in mind
	- Study Module 8: Mathematics
Week 4	- Review flashcards, take practice exams for all modules, and review all modules. Focus on areas where you struggle as identified by the flashcards and practice exams.
	- Review the cheat sheet

The 3-Month Study Plan

The three-month study plan is a more typical approach to studying in a generous timeframe, that emphasizes learning the materials and creating optimal study habits. Daily flashcard study and taking quizzes at the right time and revisiting as needed will help learners.

3-Month Study Plan	
Week 1	Study Module 1: Grammar and Module 2: Reading Comprehension
	- Review flashcards and take practice exams related to the above sections of Module 1 and 2
	- Review the cheat sheet with Module 1 and 2 in mind
Week 2	- Study Module 3: General Knowledge and Vocabulary and Module 4: Biology
	- Review flashcards and take practice exams related to these sections of Module 3 and 4.
	- Review the cheat sheet with Module 3 and 4 in mind
Week 3	- Study Module 5: Physiology and Anatomy
	- Review flashcards and take practice exams related to these sections of Module 5 in mind
	- Review the cheat sheet with Module 5
Week 4	- Study Module 6: Physics
	- Review flashcards and take practice exams related to these sections of Module 6.
	- Review the cheat sheet with Module 6 in mind
Week 5	- Study Module 7: Chemistry
	- Review flashcards and take practice exams related to Module 7
	- Review the cheat sheet with Module 7 in mind
Week 6	- Study Module 8: Mathematics
	- Review flashcards and take practice exams related to Module 8
	- Review the cheat sheet with Module 8 in mind
Week 7	- Revision of Module 1: Grammar and Module 2: Reading Comprehension
	- Take practice exams and flashcards from Module 1 and 2 and note areas where you struggle
	- Review the cheat sheets and note areas you should expect to find in the exam from this module
Week 8	- Revision of Module 3: General Knowledge and Vocabulary and Module 4: Biology
	- Take practice exams and flashcards from Module 3 and 4 and note areas where you struggle

	<ul style="list-style-type: none"> - Review the cheat sheets and note areas you should expect to find in the exam from this module
Week 9	<ul style="list-style-type: none"> - Revision of Module 5: Physiology and Anatomy and Module 6: Physics
	<ul style="list-style-type: none"> - Take practice exams and flashcards from Module 5 and 6 and note areas where you struggle
	<ul style="list-style-type: none"> - Review the cheat sheets and note areas you should expect to find in the exam from this module
Week 10	<ul style="list-style-type: none"> - Revision of Module 7: Chemistry
	<ul style="list-style-type: none"> - Take practice exams and flashcards from Module 7 and note areas where you struggle
	<ul style="list-style-type: none"> - Take practice exams and flashcards from Module 7 and note areas where you struggle
Week 11	<ul style="list-style-type: none"> - Revision of Module 8: Mathematics
	<ul style="list-style-type: none"> - Take practice exams and flashcards from Module 8 and note areas where you struggle
	<ul style="list-style-type: none"> - Review the cheat sheets and note areas you should expect to find in the exam from this module
Week 12	<ul style="list-style-type: none"> - Final revision of areas where your knowledge needs to improve
	<ul style="list-style-type: none"> - Take practice exams and try more flashcards, focusing on those areas
	<ul style="list-style-type: none"> - Review the cheat sheet for a final time

The 6-Month Study Plan

The six-month study plan is for someone that doesn't have the time to study every single day and wants to learn on the side, while still preparing for the certification exam. The main aspect of this study plan is trying to reach a goal within an extended period. It is more along someone's own timeframe, where they fit studying in for a few days each week, just enough to keep materials fresh and current.

6-Month Study Plan	
Month 1	- Start by taking the practice exams, just to get a general idea of the materials and your comfort with them.
	- Study Module 1: Grammar and Module 2: Reading Comprehension
	- Review flashcards and take practice exams related to the above sections of Module 1 and 2
	- Review the cheat sheet with Module 1 and 2 in mind
Month 2	- Study Module 3: General Knowledge and Vocabulary and Module 4: Biology
	- Review flashcards and take practice exams related to these sections of Module 3 and 4
	- Review the cheat sheet with Module 3 and 4 in mind
Month 3	- Study Module 5: Physiology and Anatomy
	- Review flashcards and take practice exams related to these sections of Module 5.
	- Review the cheat sheet with Module 5 in mind
	-
Month 4	- Study Module 6: Physics and Module 7: Chemistry
	- Review flashcards and take practice exams related to these sections of Module 6 and 7
	- Review the cheat sheet with Module 6 and 7 in mind
Month 5	- Study Module 8 Mathematics
	- Review flashcards and take practice exams related to this module.
	- Review the cheat sheet taking note of areas that you will find in the exam
	- Revise Module 1 to 4
Month 6	- Revise Module 5 to 8
	- Use the flashcards and practice exams to highlight areas in all the modules where you are struggling and revise those areas again.
	- Review the cheat sheet taking note of areas that you will find in the exam

The 1-Year Study Plan

The one-year study plan is for someone that only has time for around 1 or 2 days of study throughout the week.

1-Year Study Plan	
Month 1	- Start by taking the practice just to get a general idea of the materials and your comfort with them.
	- Study Module 1: Grammar
	- Review flashcards and take practice exams related to these sections of Module 1
Month 2	- Study Module 2: Reading Comprehension
	- Review flashcards and take practice exams related to these sections of Module 2
Month 3	- Study Module 3: General Knowledge
	- Review flashcards and take practice exams related to these sections of Module 3
Month 4	- Study Module 4: Biology.
	- Review flashcards and take practice exams related to these sections of Module 4
Month 5	- Module 5: Physiology and Anatomy
	- Review flashcards and take practice exams related to these sections of Module 5
Month 6	- Study Module 6: Physics
	- Review flashcards and take practice exams related to these sections of Module 6
Month 7	- Study Module 7: Chemistry
	- Review flashcards and take practice exams related to these sections of Module 7
Month 8	- Study of Module 8: Mathematics
	- Review flashcards and take practice exams related to these sections of Module 8
Month 9	- Take some practice quizzes just to get a general idea of your knowledge base before you begin revision work
	- Start to familiarize yourself with the cheat sheet and specific areas you know will appear on the exam for each module

Month 10	- Revise all of Module 1,2,3, and 4
	- Re-read the chapters with information that you had trouble with during the practice exams and flashcards.
	- Continue your flashcard studies on a semi-daily basis from all of Module 1,2,3, and 4.
	- Review the cheat sheet
Month 11	- Revise all of Modules 5,6, and 8.
	- Re-read the chapters with information that you had trouble with during the practice exams and flashcards.
	- Continue your flashcard studies on a semi-daily basis from all of Module 5,6,7, and 8.
Month 12	- Continue revising in your weak areas.
	- Take as many of the practice exams as you can
	- Continue your flashcard studies on a semi-daily basis from all modules
	- Review the cheat sheet
